The Start-a-Factory project is made possible with the financial support of the European Regional Development Fund (ERDF), the State of Berlin, and the German Federal Ministry of Education and Research.
RESHAPING THE START-UP ECOSYSTEM

The mission of Start-a-Factory is to become the new iteration of the legendary Silicon Valley start-up garage: Equipped with high-tech facilities and tailored specifically to the needs of young and eager enterprises. This creates a perfect opportunity for that vital step from the first idea to a tangible prototype that is ready for industrial production.

Services:

- Cost-efficient and flexible access to technology
- Individual solutions for later reproduction on standard equipment
- Space and facility use concepts
- Process briefs
- Development and prototype construction
- Modular and adaptable for most environments

Target Groups:
Technology parks and incubators

CALLING ALL HARDWARE START-UPS

We invite all innovative SMEs and hardware start-ups in the early stages of development to test the implementation of their new products and develop the iterative processes needed for full-scale production. We can pinpoint the most common problems and develop effective solutions to master them.

Your Benefits:

- Flexible and modular laboratory facilities
- Access to Fraunhofer expertise for product and prototype development
- Advice on value chain optimization
- Tangible results in record time

Turning visionary ideas into prototypes in a few weeks!

Target Groups:
SMEs and hardware start-ups
