

CALL FOR EXHIBITORS

SEPTEMBER 13 – 16, 2022

9th ELECTRONICS SYSTEM-INTEGRATION TECHNOLOGY CONFERENCE, SIBIU, ROMANIA

THE SINGLE LARGEST SEMICONDUCTOR PACKAGING CONFERENCE IN EUROPE

The Electronics System-Integration Technology Conference (ESTC) is the premier international event in the field of electronics packaging and system integration in Europe. The conference is organized every two years and is the IEEE-EPS flagship conference in Europe supported by IEEE-EPS in association with IMAPS-Europe. The 9th ESTC will take place in Sibiu, Romania. Placed in the middle of Romania, surrounded by the high Carpathian Mountains and Cibin river, Sibiu is a citadel of the European electronics industry and represents a place where culture, landscape, gastronomy, and profession merge in a friendly pleasant environment.

Save the date right now! - Read more about the conference and its history at www.estc-conference.net

The event brings together both scientific academics and industry leaders to present and discuss state-of-the-art and future trends in packaging and integration technologies. **ESTC is the perfect place for you to present your latest developments, promote your company or institution to the packaging community and get in contact with your existing and new customers and partners.**

DON'T MISS TO EXHIBIT at the 9th ESTC in Sibiu (Hermannstadt), Siebenbürgen, Transylvania – Home of the famous Wallachian Count Vlad III. Drăculea (“Son of the Dragon”, around 1431 – 1476), who inspired Irish author Bram Stoker to the novel “Dracula”, published in 1897 and one of the most famous pieces of English literature. Your chance to experience famous historic places.

AUDIENCE

The conference provides your company or institution a unique opportunity to exhibit your products and services to more than 300 engineers, managers, and decision makers from all areas of the microelectronics and system-integration industry, academics, and research institutes. These include material, equipment, software tools, design and simulation, processes and services for semiconductor assembly, interconnect, packaging, test, process control and analysis technologies as well as market research.

To meet the audience interest best, the exhibitors should focus on the following topics:

- Advanced packaging
- Optoelectronic systems packaging
- Design tools and modeling
- Advanced technologies for emerging systems
- Flexible, printed and hybrid electronics
- Materials for interconnects and packaging
- Assembly and manufacturing technologies
- Power electronics system packaging
- Reliability and quality of electronic devices and systems
- RF, mm-wave and THz systems packaging
